OVERDUE BOOSTER?

Restart in May and save £££

If your dog or cat has not been vaccinated in the last 18 months (Rabbits 9 months), its immunity to any or all of the diseases that kill thousands of animals each year may have lapsed. Therefore PLEASE use the opportunity of National Vaccination Month to restore your dog or cats protection in full (see Offer terms below).

May 2011

Go to www.NVMonline.co.uk to print your voucher. Alternatively we can print a blank voucher form for you to complete at *The Ark*.

Offer terms: Dogs and Cats over 18 months of age that have not been vaccinated in the last 18 months will receive a primary course for the cost of a booster. Rabbits over 9 months of age and have not been vaccinated in the last 9 months will receive a FREE second Myxomatosis vaccine 6 months after the first paid dose.

SMALL ANIMAL PRACTICE

We care because you do! The Ark Veterinary Centre offers state of the art ultrasound, digital X-Ray, P.E.T.S travel scheme, a separate surgical theatre, in house laboratory, Acupuncture and don't forget our Very Important Pet (VIP) plan. Benefits include 3 health checks per year, boosters, free worming and flea treatment and money off food and operations!

The Importance of Insuring your Pet

If you have just picked up your new puppy / kitten or have successfully re-homed a pet from a rescue centre such as the RSPCA, the next fundamental step is to get them insured. If you decide to bring your new puppy / kitten to us for their vaccines we will give you 4 weeks FREE insurance with Petplan®. This gives you valuable time to search through all the quotes and available insurers and select an appropriate plan. As this can be a daunting task we have including the important points to note when choosing your policy.

1. Don't just select based on price alone. Choosing this method may work out being more expensive in the long run if you have to make a claim or your pet develops a life long condition.
2. Check the fine print. There are often three bands regarding claim limits. **Lifelong**—the best, as you guarantee (subject to yearly maximum claim amount) treatment for life. **Yearly**—the condition is treated for up to a year only. This can be frustrating if your pet develops a life long condition such as diabetes! **Maximum amount**—A claim limit is set per condition. As with the yearly limit, this does not cover potentially lifelong conditions that extend beyond the amount given.

The **VIP** Plan

"The opportunity to budget monthly for your pet's health"

Pet of the Month

Our Pet of the Month for May is **Casey Sale**. Casey is 11 years old and has had long term issues with her ears which eventually lead to her ear canal being removed in one ear. If that major surgery was not enough for one dog, earlier this year we felt a lump in her tummy which turned out to be a mass on her spleen. We decided to operate and successfully removed the Spleen along with lump. She is recovering well and is back to going for walks. Casey is a lovely dog and much loved within *The Ark*. We are all keeping our fingers crossed that her recovery continues. Well done Casey!

With more than 3000 high quality, low price pet products available online with next day collection, have you checked that we're not cheaper?
